

# Wild dogs

*The largest dog is the wolf. It looks like a German Shepherd. The color of the wolves are black and white.*

Produced by: Jamil M. Myles

# *C OYOTES*

---

- Coyotes look like a small wolf. Coyotes are found in many parts of the United States. They eat rabbits, mice and dead animals.

# F. O .X .E .S <

- Foxes look like a small, thin dog. But all foxes have different colored fur and bushy tails and long snouts. Foxes live throughout most of the world .

# Jackals

- Did you know Jackals are wild dogs and looks a lot like foxes? They mostly eat` anything that is a small animal, mostly dead animals. You will only catch them in Africa and Asia.

# Dingeous

- Dingoos are medium-sized dogs found only in Australia. In the wild, dingoos howl instead of bark. Dingoos eat sheep and small kangaroos .The Australian government has tried to get rid of these wild dogs .
